
Shape Metal with a Hydraulic Press | Term Four, 2024

Ever heard of a 'Bonny Doon'? Possibly.
It's another name for a special kind of hydraulic press which can be used to enhance your jewellery practice. You will be able to use the press to make 3-D shapes and decorative surfaces.
Suitable for all jewellery levels, or students who have some metalworking experience.

Content

Explore all the ways a hydraulic press can be used. Possibilities include creating relief designs, or bases for champlevé enamelling or resin work.
You are encouraged to do some research before the class, so you can make the most of the press over the week.

Objectives

- To broaden your repertoire of skills and artistic options.
- To make sample pieces for future use/reference.
- To maximise the use of the hydraulic press as a tool in your jewellery making.
- To learn to safely use a hydraulic press.

Outcomes

- You will gain understanding in the ways a hydraulic press can be used.
- You will have learned new skills.
- You will have sample pieces to use in your jewellery making.
