
TERM 4: Christmas Bling | Term Four, 2024

This class is guaranteed to be a busy, full and fun week. Melt and up-cycle silver scrap or old silver jewellery, turning this into a metal sheet and wire to then create unique pieces of jewellery. We will also look at how we can create our own Shibuichi, a traditional Japanese alloy made from copper and silver. Learn how to use saw piercing and roll printing techniques to create an array of beautiful jewellery pieces that you can take home to keep or gift for Christmas. This class is perfect for those who are beginners to the craft or those who already hold jewellery skills and want to learn how to get the most out of their metals or perhaps finish off projects from earlier in the year.
